Cesco Underglazes

Cesco Underglazes are Australian Made concentrated Underglaze stains in a beautiful flowing brushing medium. They are fully ball milled, lead free and non toxic. They all have a high percentage of stain, giving strong reliable colours when fired at either Earthenware or Stoneware. 32 colours with a silky smooth application are bottled ready to use OR they can be extended with FE110 Colour Extender or water and will still retain good colour intensity. Adding FE100 Flux Extender turns them into beautiful colours for majolica decoration. They can be intermixed within the range and also with Wunder Colours and Design Colours.
