

## MENDERS & ENHANCERS

### AC306 Mayco Clay Mender (59ml (2oz)) \$7.45

Clay Mender is an “enhanced slip” that is intended to be used to repair and/or add attachments to greenware or bisque.

Simply moisten pieces with water-no extra adhesive required!

1. Scoring the location where an attachment will be placed will strengthen the bond. Use a needle tool, toothpick, etc. to score the surface.
2. Apply a generous coat of Clay Mender and immediately and firmly press the pieces together, holding them into place for 10-20 seconds until they become affixed.
3. Let the area dry.
4. After drying, the areas can then be sanded and smoothed to prepare for decoration.
5. A top dressing of an underglaze may be needed.
6. Clay Mender sometimes will show a slightly different colour than the clay being used.
7. There are times when the glaze will not readily adhere to the mended area and the top dressing of an underglaze will overcome this problem.
8. Fire to shelf cone 04.

### APTII Ceramic Enhancer (59ml (2oz))

**\$23.10**

APT II Ceramic Enhancer is an acrylic emulsion additive that is food safe and non-toxic. It cleans up with water and has an indefinite shelf life. APT-II Ceramic Enhancer will thicken all brands of slip and clay bodies, which enables attaching, mending and creating surface decorations on greenware, bisque or finished glazed pieces.

### APTII Porcelain and Stoneware Enhancer (59ml (2oz))

**\$23.10**

Mends and attaches bisque, glazed & greenware pieces. Provides smoother application of glazes & colours.
