

CESCO COLOURS 1000 - 1280°C

- Cesco colours are intermixable (except No. 17 Orange)
- Suitable for most earthenware bodies
- Best results obtained by firing to 1100°C under Cesco Clear Earthenware Gloss Glaze
- Most underglazes will fire to stoneware temperatures with some loss of colour intensity
- May be fired on greenware or bisque either under or over glaze

See the full colour chart at www.clayshed.com.au

RECOMMENDED TECHNIQUES

DECORATING

1. Apply the underglaze by brushing the dry clay ware with 1 to 3 coats.
2. Bisque fire.
3. Apply suitable clear glaze (brushing, dipping, spraying).
4. Glaze fire.

Note: If the undercoat is too thick, "crawling" may occur. No. 12 Ebony Black and No. 19 Royal Blue give best results when applied thinly. Alternatively, underglazes may be applied to bisqueware, but it is then preferable to use a brush-on clear glaze.

UNGLAZED WARE

1. Apply glaze (brushing, dipping, spraying) to bisqueware.
2. Brush on underglaze to unfired glaze surface.
3. Glaze fire.

Note: It may be necessary, under some conditions, to add from 5% to 20% clear glaze to the underglaze before use. It is recommended that trials be carried out to determine any additions needed.

The clear glaze used should mature at the glaze firing temperature and be compatible with the base glaze.

SOME NOTES REGARDING THE SHELF LIFE OF CESCO UNDERGLAZES

Cesco underglaze colours contain a binder system to allow easy application. The binder will deteriorate with time. The shelf life is affected by a number of factors but would normally be expected to be greater than two (2) years. Unfortunately once the binder has deteriorated, it is not possible to safely restore its properties.

We recommend the following to ensure the maximum usable life of Cesco underglazes:

- Always keep the container lid firmly screwed on.
- Stir underglazes only with a clean dry blade before use.
- If some underglaze is decanted into a working container, do not return any excess to the original particularly if water has been used.
- Purchase quantities of underglaze relevant to your usage rate.

COLOURS

WALKER CERAMICS DESIGN COLOURS are a range of colours to be applied either under or over the glaze. Australian made, lead free, liquid colour concentrates of the highest standard. This range has numerous decorative applications, that give from opaque to translucent effects.

- **Magnificent vibrancy on Earthenware**
- 25 ball milled colours—the **STRONGEST** ever developed
- Beautiful silky flow characteristics & they will not powder
- Can be applied to Greenware or Bisque
- Perfect for Majolica
- All colours are completely intermixable within the range or with Walker's range of Wunder Colours
- Ready to use & economise with Walker's specialist Flux Extenders
