

# The Clay Shed

## *Catalogue*

*Effective January 2012*

## About Us

Cameron Hess is a second generation potter with over 20 years experience in the industry. Since commencing ownership of the Clay Shed in early 2009 he has quickly earned a reputation for his warm welcome and friendly, helpful service.

The Clay Shed stocks over 50 clay bodies and an extensive range of glazes, colours, tools, brushes, refractory materials and studio equipment. Everything for the beginner through to the experienced potter.

The Clay Shed offers it all.

## How To Find Us

The Clay Shed  
ABN 31 481 281 072  
2/24 Hi Tech Drive, Kunda Park QLD 4556  
Ph: 07 5476 5977 Fax: 07 5476 6061  
Email: [clayshed@internode.on.net](mailto:clayshed@internode.on.net)  
Web: [www.clayshed.com.au](http://www.clayshed.com.au)

## Trading Hours

**Mon-Fri: 8:30am - 5pm**  
**Sat: 8:30am - 12pm**  
**Closed: Sundays & Public Holidays**

---

## Table of Contents

Services	4
Prepared Clay Bodies	5 - 6
Casting Slips & Powders	7
Raw Materials	8 - 9
Materials, Frits & Stains	10
Colours	11 - 14
Lustres	15
Glazes	16 - 19
Transfer Papers	20 - 21
Brushes	22 - 23
Sprayers, Sponges & Tools	24
Tools	25 - 31
Teapot Handles & Miscellaneous	32
Publications	33
Studio Equipment	34 - 35
Kiln Building Materials	36 - 37
Cones & Stilts	38
Bisqueware	39
DIY Woodfired Pizza Ovens	40

**Please Note:**

*All prices in this catalogue include 10% GST and are correct at time of publication and are subject to change without notice. Please contact The Clay Shed prior to ordering should pricing confirmation be required. When contacting The Clay Shed to arrange an order for items not listed in this catalogue please note that a 20% deposit will be required upon ordering.*

*Goods will only be accepted for return if prior arrangement has been obtained within 7 days of receipt of goods. All materials should be sampled for their suitability prior to use. It is important to prove their effectiveness under the particular conditions that they are to be subjected to.*

*Title and ownership of goods does not pass to the purchaser until payment in full has been made. Until such time goods remain the property of The Clay Shed.*

*Material Safety Data Sheets are available upon request.*

Firing Service

Bisque Firing 1000°C

Earthenware Glaze Firing 1100°C

Midfire Glaze Firing 1200°C

Stoneware Glaze Firing 1280°C

MINIMUM CHARGE \$4.50 PER KG\*

See our website for more information or contact The Clay Shed for current firing schedule.

\* Charges are a general guide and are subject to change. Size & style of the work will be considered when establishing a fee.

Ilkley Farm Pottery  
Pottery Classes

Tues - Thurs  
9-12

1st Saturday of each Month  
9 am onwards

145 Ilkley Road, Ilkley

For more details  
Ring Jackie Gasson  
0438 450 349

**STUDIO EQUIPMENT**  
**FOR HIRE**

**POTTERY WHEELS**  
**AND**  
**SLAB ROLLERS**

**\$20 PER WEEK or \$50 PER MONTH**

*Contact The Clay Shed for bookings.*

## PREPARED CLAY BODIES

### FEENEYS (12.5kg)

*Feeney's clays should be bisque fired at not less than 1020°C.  
Do not bisque below this temperature as cracking and/or bloating may occur later during the glaze firing.*

CODE	CLAY BODY	Texture	1-4 packs	5-39 packs	40-79 packs	80+ packs	Firing Range

### **NOT LISTED?**

Please contact us should the clay body, slip or powder you are looking for not be listed as special orders may be arranged.

Please allow 2-3 weeks for availability of special orders.

**NEW!**

### **Australian Sun Clay**

Air hardening clay—no need for firing—dries hard

Safe, multi-purpose and economical. Great for modelling, throwing, sculpting and hobby projects.

Dries leather hard in 24 hours and rock hard within several days (actual drying time varies with temperature, humidity and thickness of clay). Decorate with acrylic paints. Must be sealed with a commercial water sealant to waterproof.

**NEW!**

**Available in  
White & Red**

**1kg \$4.99**

**2kg \$7.95**

**5kg \$18.75**

**10kg \$36.25**

## CESCO COLOURS

Cesco colours are intermixable (except No. 17 Orange)  
 Suitable for most earthenware bodies  
 Best results obtained by firing to 1100°C under Cesco Clear Earthenware Gloss Glaze  
 Most underglazes will fire to stoneware temperatures with some loss of colour intensity  
*(Colours marked \* can burn out at stoneware temperatures)*  
 May be fired on greenware or bisque either under or over glaze

## RECOMMENDED TECHNIQUES

### DECORATING

1. Apply the underglaze by brushing the dry clay ware with 1 to 3 coats.
2. Bisque fire.
3. Apply suitable clear glaze (brushing, dipping, spraying).
4. Glaze fire.

Note: If the undercoat is too thick, "crawling" may occur. No. 12 Ebony Black and No. 19 Royal Blue give best results when applied thinly. Alternatively, underglazes may be applied to bisqueware, but it is then preferable to use a brush-on clear glaze.

### UNGLAZED WARE

1. Apply glaze (brushing, dipping, spraying) to bisqueware.
2. Brush on underglaze to unfired glaze surface.
3. Glaze fire.

Note: It may be necessary, under some conditions, to add from 5% to 20% clear glaze to the underglaze before use. It is recommended that trials be carried out to determine any additions needed.

The clear glaze used should mature at the glaze firing temperature and be compatible with the base glaze.

### SOME NOTES REGARDING THE SHELF LIFE OF CESCO UNDERGLAZES

Cesco underglaze colours contain a binder system to allow easy application. The binder will deteriorate with time. The shelf life is affected by a number of factors but would normally be expected to be greater than two (2) years. Unfortunately once the binder has deteriorated, it is not possible to safely restore its properties.

We recommend the following to ensure the maximum usable life of Cesco underglazes:

- Always keep the container lid firmly screwed on.
- Stir underglazes only with a clean dry blade before use.
- If some underglaze is decanted into a working container, do not return any excess to the original particularly if water has been used.
- Purchase quantities of underglaze relevant to your usage rate.

## COLOURS

WALKER CERAMICS DESIGN COLOURS are a range of colours to be applied either under or over the glaze. The technical expertise of our ceramic engineers and laboratory staff has enabled us to provide the ceramic industry with Australian made, lead free, liquid colour concentrates of the highest standard. This range has numerous decorative applications, that give from opaque to translucent effects.

Magnificent vibrancy on Stoneware—even better on Earthenware

24 ball milled colours—the STRONGEST ever developed

Beautiful silky flow characteristics & they will not powder

Can be applied to Greenware or Bisque

Perfect for Majolica

All colours are completely intermixable within the range or with Walker's range of Wunder Colours

Ready to use & economise with Walker's specialist Flux Extenders

## Applying Lustre

Lustres may be fired on glass and glazed ceramic. For best results the lustre should be applied evenly to clean glazed surfaces with a flat camel hair or sable brush. A much thinner application should be used if firing on glass. Too heavy a coat will blister or flake. Uneven coats may cause variations. Thin, even applications of lustres are a must. If a deeper colour is desired, then reapply the material being used and re-fire. Never pat a spot, but go over the entire area and re-fire. Lustres can be applied over one another as long as you fire in between.

Work in a dust and draft free area. Dust and moisture are the two most detrimental elements in working with lustres. Clean the surface of the glaze with a cleaner to remove any dust, finger-paints, or grease-like coatings sometimes found on the ware after glaze firing.

Lustres vary in viscosity and workability. Those that appear thick and tacky can be conditioned by adding a few drops of Lustre Thinner. Lustres may be also thinned further and applied by spraying.

## MUDTOOLS

Each rib shape is available in four degrees of hardness; from very soft to very firm. You choose the shape and hardness that suits your clay and your working style.

### VERY SOFT (RED)

Great for compressing slabs, burnishing rims, chamois, and hand building.

### SOFT FLEX (YELLOW)

Perfect for smoothing, burnishing, porcelain, throwing, and hand building

### MEDIUM FLEX (GREEN)

Great for compressing bottoms, burnishing, trim marks, throwing, and hand building.

### FIRM FLEX (BLUE)

Still Flexible but Stiffer. Great for high burnish and throwing large work.

Available in six shapes, these ribs cover a lot of what hand builders and throwers need from a rib.

**Only \$13.50 each**

**direct drive**  
wireless footpedal

- Packed full of innovative features;
- wireless foot pedal (no cable) - **WORLD FIRST**
  - motor directly coupled to wheelhead
  - auxiliary finger-tip speed control via touch pad
  - high efficiency motor for low power consumption
  - incredible torque, smooth and quiet
  - stainless steel body and legs

Only \$1495.00

### DIRECT DRIVE ACCESSORIES

VDD2	Riser Batt	55.80
VDD3	Standard Batt	31.90

### VENCO SLABROLLER

1895.00

#### Specifications

Table Height 87cm Table Length 120cm  
Table Width 82cm Roller Width 76cm  
Packed Weight 70kg (0.52m<sup>3</sup>)

- ❖ Competitively priced
- ❖ Easy roller adjustment with thickness indicator
- ❖ Large diameter operator handle for easy rolling
- ❖ Comes complete with canvas
- ❖ Very stable galvanised and powdercoated steel frame
- ❖ Large work tables

Additional Canvas

98.90

### CONES

NOTE: When ordering cones please be sure to state whether you require mini or standard cones.

CODE		\$ ea	\$ per Box 50
MC	Mini Cone 	0.55	18.20
SC	Standard Cone 	0.70	25.20
SCS	Standard Cone Stand 4 Hole	1.50	N/A

### The Three Cone System

While a single cone may be used on a shelf to "witness" the firing, it is recommended to use three different cones.

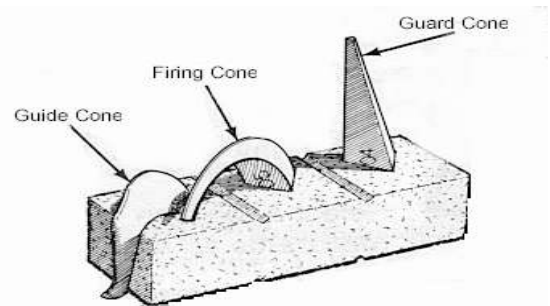

The group consists of a Firing Cone - the desired cone for the ware being produced; the Guide Cone - one cone number cooler; and the Guard Cone - one cone number hotter than the Firing Cone.

These cones need to be set deep in the kiln, yet should be visible through the bung hole.

When the Guide Cone starts to bend, the ware is approaching maturity.

The bending of the Firing Cone indicates that the firing is at its correct stage.

If the Guard Cone has bent, the firing has passed its best time-temperature window.

SS STILT STONE 6.50

### STILTS

#### STEEL POINTED, 3 POINT STAR

Suitable for firing to 1200°C only

CODE	SIZE (Point to Point)	\$
SS1	18mm	2.25
SS2	25mm	2.50

# Woodfired Pizza Ovens

*Perfect for outdoor entertaining!*

*The simple & deliciously enticing taste of woodfired cooking.*

*Pizza, roasts, bread, scones, damper or anything that you would cook in your conventional oven.*

Create an artistic focal point.

A functional gathering place.

An aromatic natural heater in the garden.

Able to be utilized all year round.

## DIY Pizza Ovens

We stock materials for DIY pizza ovens!

- Refractory goods  
(high temperature cements & mortars)
- Dense Fire Paves
- Insulation

*Build your own to suit what size and shape you like. Even choose your render colour.*

The Clay Shed is the Queensland distributor of Clayworks Woodfired Pizza Ovens. For more information please visit the Clayworks Woodfired Pizza Oven website [www.clayworkswoodfiredovens.com.au](http://www.clayworkswoodfiredovens.com.au) or contact us.

1. Easily installed by two capable people, no need for fork lift trucks or cranes.
2. Robust construction using high quality refractory materials able to withstand 1300°C and reinforced with stainless steel pins.
3. Excellent geometry which means that fire management is simple and excessive smoke avoided.
4. Large cooking area.
