To be applied to terracotta or other coloured clays to make glazes and underglazes fire to the same colour as they normally show on white clay. Brush onto clayware and decorate before bisque firing. Suits standard earthenware bodies.					
AD4976	Cesco Terra Sigillata	N/A	9.90	N/A	N/A

*NOTE: +2ppm glazes contain fritted lead and may yield in excess of 2 parts per million of soluble lead under certain conditions of application and firing. These glazes are NOT suitable for contact surfaces of food or beverage ware.

Duncan® Crystals glazes™

The brilliance of fireworks is transferred onto bisque with Duncan® Crystals Glazes™. The easiest glaze to apply, crystal pebbles of varying sizes are embedded into the glaze and burst in the kiln to reveal an explosion of multicolor flecks. The result is a distinctive and unique array of colors that even a novice artist can achieve.

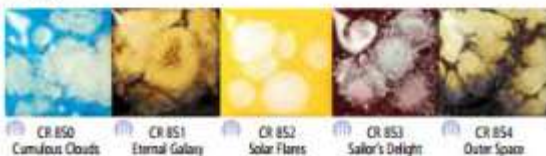

Fire to shelf cone 06

\$11.90 each
4oz jar (approx. 118ml)

Eight newest!

Tips

- ✓ To create custom looks, apply Crystals in combination with other glazes and other colours.
- ✓ Crystals work well to high fire cone 5-6. For high fire application, it is recommended to fire a test piece.

Duncan® Color Burst Crystal Chips

Duncan® Color Burst Crystal Chips will make your ceramic art projects explode with an eruption of colour! Available in a popular array of colours and various sized chips, Color Burst Crystal Chips can be mixed with any of your favourite glazes or placed where desired when the glaze is wet to create one-of-a-kind pieces that explode with vibrant bursts of colour. Crystal chips will react differently in the firing process depending on what glaze you pair them with, changing the colour, burst size or amount of flow. Firing range cone 06 to cone 6.
