Pure Brilliance® Brush-On Clear Glaze

How to Use

- Mix clear glaze with palette knife.
- Sponge Application:* Dab a clean sponge into glaze and dab one coat over colours on surface of bisque to cover. After the sponged coat has dried thoroughly, load glaze brush with glaze and brush on two coats. Allow to dry between coats.
- Brush Application:* Load a glaze brush with glaze and apply two flowing coats. Let dry between coats.
- Let ware dry thoroughly. Set ware securely on clean, sharp stilts in kiln.

Duncan® Crystals glazes™

The brilliance of fireworks is transferred onto bisque with Duncan® Crystals Glazes™. The easiest glaze to apply, crystal pebbles of varying sizes are embedded into the glaze and burst in the kiln to reveal an explosion of multicolor flecks. The result is a distinctive and unique array of colors that even a novice artist can achieve.

Fire to shelf cone 06

\$11.90 each
4oz jar (approx. 118ml)

Eight newest!

Sky

Earth

Tips

- ✓ To create custom looks, apply Crystals in combination with other glazes and other colours.
- ✓ Crystals work well to high fire cone 5-6. For high fire application, it is recommended to fire a test piece.

Color Burst Crystal Chips

Duncan® Color Burst Crystal Chips will make your ceramic art projects explode with an eruption of colour! Available in a popular array of colours and various sized chips, Color Burst Crystal Chips can be mixed with any of your favourite glazes or placed where desired when the glaze is wet to create one-of-a-kind pieces that explode with vibrant bursts of colour. Crystal chips will react differently in the firing process depending on what glaze you pair them with, changing the colour, burst size or amount of flow. Firing range cone 06 to cone 6.
